

# NATURAL SOAP

## PRODUCT INFORMATION

### GENERAL DESCRIPTION

Natural Soap provides gentle and effective care for wooden floors.

- Ideal for cleaning and maintaining soap and oil treated wooden floors.
- Can also be used to protect lye-treated surfaces.
- Seals the open pores of the wood, thus giving the floor a light protection against dirt and liquid penetration.

For professional and private use.

**Application tools:** Cloth or flat mop.

**Substrate temperature:** Minimum 15 °C.

**Storage:** Lasts for 2 years if unopened and stored at 20 °C. Not to be exposed to temperatures below 5 °C.

## DIRECTIONS FOR USE

### Cleaning and maintenance:

- Sweep or vacuum the floor to remove dirt and grit.
- Mix 250 ml Natural Soap with 5 litres of warm water.
- Wash the surface along the direction of the floorboards and woodgrain.
- Always use a hard-wrung floor cloth or mop
- Remember that a wooden floor does not tolerate soaking. Any water spillage must be wiped up immediately to avoid moisture damage.
- If the floor is very dirty you can work with two buckets, one for clean soapy water and the other for wringing out the cloth.

### Protection of lye-treated surfaces:

- 1 litre of Natural Soap is mixed with 10 litres of warm water.
- To saturate the wood, wash the floor three times in two days.
- Always use a well wrung cloth or mop.
- A wooden floor does not tolerate soaking, and any water spillage must be wiped up straight away to avoid water damage.
