

PUR DESIGN FLAKES

PRODUCT INFORMATION

GENERAL DESCRIPTION

PUR Design Flakes are a specially developed solution to give PU-floors, vinyl floors (PVC) and linoleum floors a unique and decorative terrazzo look. The innovative PUR Design Flakes are throughout coloured, randomly shaped and ideal for adding character to a room.

Choose between white or black PUR Design Flakes or combine the colours to tailor the appearance of the floor your taste. If the floor surface is slightly uneven, PUR Design Flakes can be used to partially hide this imperfection.

Spread the flakes directly onto the floor when applying PUR Floor Colour.

For professional use.

PRODUCT DESCRIPTION

Product: Poly Vinyl Acetate (PVA).

Package size: White and black: 500 grams.

TECHNICAL DATA

Coverage: Approx. 15 g/m².

The quantity indicated should be regarded as a guide only, as it is assumed that the desired level of coverage is individual.

Average thickness: 70 µ.

DIRECTIONS FOR USE

- PUR Design Flakes are scattered on the floor during the application of Junckers PUR Floor Colour.
- It may be beneficial to use a handheld fertilizer spreader for this purpose.
- To achieve a uniform colour effect on the floor surface, when using multiple colours, it is recommended to mix them before scattering.
- Along walls it is recommended to scatter manually, as Design Flakes hitting the wall will fall down and create an edge with a higher concentration of flakes than on the rest of the floor.
- Alternate the application of Junckers PUR Floor Colour with the scattering of PUR Design Flakes to ensure that you cover the entire area and scatter the PUR Design Flakes evenly.
- PUR Design Flakes should always be protected with 1 coat of Junckers PUR Floor Sealer.
- See the Junckers PUR Floor Colour data sheet for more information.
